

Otázka: Family in the Czech Republic

Jazyk: Angličtina

Přidal(a): Michaela

It says that family is base of every state. I think it is true. It consist woman, men and child. Generaly Czechs are greedy. They want to save every where. The mens go to pubs. They drink the famous czech beer and eat typical poor with dumplings and cabbage.

Typical czech womans are in the kitchen and still cleans and take care of the household and children.

In to the family also includes uncles, aunts, cousins, grandparents.

Unfortunately at least time a lot of famillies are incompleted. Most couples are divorcing. These divorces have bad impact on childrens.

More work and worry thank more parents can not be given to children.

Childrens are constantly on cell phones and they dořnt can communicate with each other.

I think this time the parents haven't more free time for their childrens a lot of childrens spent time on computers and mobiles.it isn't good for child. Before children played and went out.

I have got a very big family. I have one sister. She is my twins. Since child we have together everywhere. We have lots of together friends and experienst.

From their mother sides i have lots of cousins.Totally

From their father sides only two.

I have only one grandpa and grandma.

They all have many childrens. So we are very big family.
