

**Otázka:** Global issues

**Jazyk:** Angličtina

**Přidal(a):** Zuzia

At the moment we have many burning issues in our fast world. We can name for example terrorism, wars, racism, diseases, poverty, unemployment.

First of all I would like to talk about **UNEMPLOYMENT**. In the Moravian - Silesian region, where I live - it is one of the biggest problems. A lot of people leave their homes and go to Prague or some European countries to get work and earn some money. Another problem is **AIR POLLUTION**. It is also a big problem. Pollution in the air destroys the atmosphere and influences climate.

I'd like to mention also **TERRORISM**. There are many groups, which are being brought up in the hatred and they are told some lies, which turn them into terrorism. We can personally experience the fear of terrorism by simply travelling by plane. All the airports in the whole world the safety regulations are much stricter nowadays than before.

The well-known and the most disastrous of them was September 11, 2001 attack on the World Trade Center in New York.

Another issue I'd like to mention is getting the powers of the land where are natural resources of energy or second most common reason is lack of tolerance towards people's religious beliefs. There are the two main reasons for opening a new **war**.

Next issue I would like to talk about is **poverty**, which is the worst problem in Africa. From my point of view this is the most optimistic issue of global problems, because the German scientists thought of a project, which should build a new solar panel plants in Africa and that

way Africa could sell the energy and in a such way become financially independent part of the World. I hope it comes true.

The sixth issue in the problem of natural **disasters**. Here I can name earthquakes, volcanoes eruptions, floodings, hurricanes. There is very little we can do to prevent, it can happen very quickly (flood), kill a lot of people and destroy their houses and other property.

The last issue I'd like to mention are the world known **diseases** such as leprosy, cancers, AIDS, and other sexually transmitted diseases. There are many charitable organisations, which together with the Red Cross try to prevent and help people in the whole World from these illnesses.

I think that there are many global problems in the world and that we should solve them and help other people when they need it.
