Although we are a small country, some of our products have created a very good reputation to us, *such as* beer from the town of Plzeň called Pilsner, or the car/automobile brand Skoda.

There are also several personalities who are famous outside our republic, some of them even all over the world/in the whole world. We can name/mention Jaromír Jágr, a hockey player, Václav Havel, a dramatist and our former president, Miloš Forman, an Oscar film director, and *last but not least* professor Wichterle *who* invented contact lenses. Generally, we can be proud of great sportsmen, artists and clever brains. *Some of which* invented also the infamous semtex and brought a new meaning to the word “tunnel” – a metaphor for a way of stealing money from banks and companies.
